A Product of Coperion K-Tron

A FEEDER THAT MAKES YOU WONDER WHY WE HAVEN'T INVENTED IT SOONER?

» Three size options, zero features you don't need: The all-new ProRate PLUS is a feeder that might seem modest on paper, but it sure does shine when you use it for the first time (and, of course, every time after that). It's a feeder that is simple to integrate, to fill, to operate and to clean. It is robust and reliable. It gets the job done. The all-new ProRate PLUS is a lot of things, but most of all, it is: surprisingly powerful. Gravimetric feeding of free-flowing bulk solids that require neither horizontal nor vertical agitator. Ideal for feeding pellets in the plastics industry.

THIS ONE WILL.

SIMPLE. ROBUST. RELIABLE.

SIMPLE INTEGRATION

SIMPLE FILLING

SIMPLE OPERATION

SIMPLE CLEANING

100 YEARS EXPERIENCE

MADE BY COPERION K-TRON

FAST DELIVERY

PICK YOUR SIZE

» The all-new ProRate PLUS is already preconfigured and ready to go when it reaches your production facility. All you have to do during the ordering process is pick the right size for your needs. Can it really be that simple? It can. It is. And it's also the reason why the delivery time of the all-new ProRate PLUS is so impressively fast.

ROBUST DESIGN

RELIABLE TECHNOLOGY

ROBUST WEIGHING

RELIABLE HARDWARE

A TRUE TEAM PLAYER

» The all-new ProRate PLUS was designed with the specific requirements of the plastics processing industry in mind. Due to its compact design, the ProRate PLUS not only works as a single unit but also integrated into a cluster of up to six feeders which can be easily grouped around the same extruder inlet.

ALL UNDER YOUR CONTROL

»» Every ProRate PLUS comes equipped with a PCM control module. You can either choose the PCM-KD, boasting a fully-fledged operator interface in addition to its single feeder motor drive, or in a line setting you can choose the PCM-MD with just a motor drive (must connect to a feeder controlled via PCM-KD).

with one motor drive

WORTH THE WEIGHT

»» The integrated P-SFT Smart Force Transducer load cell provides reliable weight measurement under a broad range of operating conditions. Due to the vibrating wire principle of operation, in combination with its powerful on-board microprocessor, the P-SFT makes the ProRate PLUS feeder reliably accurate.

AT YOUR SERVICE

WHEREVER YOU ARE

GLOBAL SERVICE NETWORK

» No matter which country, there is a Coperion K-Tron service location close by, offering quick reaction times. Our trained experts are available to support you with a variety of service offerings, from phone support to spare parts to field service.

THE RIGHT PACKAGE FOR YOU

» A variety of Service Packages are available for ProRate PLUS feeders to ensure you can get exactly the level of service needed. Whether you are looking for fast reaction time, lifetime extension or full support, we have the right Service Package for you.

REMOTE SUPPORT

» In the digital age not everything requires a technician on site. We offer quick and easy remote services for ProRate PLUS. From an online portal to 24-hour phone support and even remote start-up assistance, we can help you keep your system running, wherever you are.

A FEEDER THAT FITS SEAMLESSLY INTO YOUR PRODUCTION LINE WITHOUT CUSTOMIZATION?

THIS ONE WILL.

SIMPLE

ROBUST

RELIABLE
